## SUBJECT INDEX

---

- Acoustic wave
  - surface, gas sensor based on film conductivity changes, 319
- Aluminum
  - humidity-sensitive Al-nC-SiO<sub>x</sub>-pSi-Al structures, 245
  - study of effect of humidity on AlO<sub>x</sub> thin-film resistors, 149
- Ammonia
  - biosensors based on ammonia sensitive metal-oxide-semiconductor structures, 91
- Antimony
  - S/N study of micro-Hall sensors made of single crystal InSb and GaAs, 29
- Arsenic
  - S/N study of micro-Hall sensors made of single crystal InSb and GaAs, 29
- Arsine
  - an SnO<sub>2</sub> thin film for sensing, 101
- Biosensors
  - based on ammonia sensitive metal-oxide-semiconductor structures, 91
- Carbon
  - humidity-sensitive Al-C-SiO<sub>x</sub>-pSi-Al structures, 245
- Carbon monoxide
  - detection by photoimpedance response of semiconductor film sensors, 161
  - effect of CH<sub>4</sub>, SO<sub>2</sub> and NO on CO response of SnO<sub>2</sub>-based thick film gas sensor in combustion gases, 271
- Cells
  - modular reaction, paper strips containing, 181
- Chemical sensor
  - actuator system, integration of; ISFET-based microlitre titrator, 11
- Chemical surface
  - modification, sensitivity control of ISFETs by, 129
- Combustion gases
  - effect of CH<sub>4</sub>, SO<sub>2</sub> and NO on CO response of SnO<sub>2</sub>-based thick film gas sensor in, 271
- Conductivity changes
  - surface acoustic wave gas sensor based on film, 319
- Differential potentiometric sensors
  - glass electrodes with solid-state membrane contacts and their application in, 261
- Electrical characterization
  - of water vapour/polymeric film system for humidity sensing, 23
- Electrical conductivity
  - of some metal oxides in inert and reducing atmospheres at high temperature, effect of oxygen on, 281
- Electrochemical sensor
  - and instrument for monitoring methane, room-temperature, 65
- Electrodes
  - glass, with solid-state membrane contacts and their application in differential potentiometric sensors, 261
- Electronic implantation
  - of sensitivity-variation offset-reduction method, theory and practice of, 197
- Gallium
  - S/N study of micro-Hall sensors made of single crystal InSb and GaAs, 29
- Glass electrodes
  - with solid-state membrane contacts and their application in differential potentiometric sensors, 261
- Gas sensor(s)
  - oxidic and organic semiconductor, problems and possibilities, 227
  - surface acoustic wave, based on film conductivity changes, 319
  - tin dioxide
    - SnO<sub>2</sub>-based thick film, effect of CH<sub>4</sub>, SO<sub>2</sub> and NO on CO response of, in combustion gases, 271

- use of Seebeck effect, 251
- Hall sensors
  - S/N study of micro-, made of single crystal InSb and GaAs, 29
- Humidity
  - study of effect of, on AlO<sub>x</sub> thin-film resistors, 149
- Humidity sensing
  - water vapour/polymeric film system for, electrical and thermodynamic characterization of, 23
- Humidity-sensitive
  - Al-C-SiO<sub>x</sub>-pSi-Al structures, 245
- Indium
  - S/N study of micro-Hall sensors made of single crystal InSb and GaAs, 29
- ISFET(s)
  - based microlitre titrator; integration of chemical sensor-actuator system, 11
  - sensitivity control of, by chemical surface modification, 129
- Magnetic field
  - functional multisensor for, and temperature measurements, 307
- Metal oxides
  - effect of oxygen on electrical conductivity of some, in inert and reducing atmospheres at high temperatures, 281
- Methane
  - effect of CH<sub>4</sub> on CO response of SnO<sub>2</sub>-based thick film gas sensor in combustion gases, 271
  - room-temperature electrochemical sensor and instrument for monitoring, 65
- Micromechanical elements
  - vibration analysis of, 235
- Modular reaction cells
  - paper strips containing, 181
- MOSFET
  - based sensors, impact of, 109
- Multisensor
  - for magnetic field and temperature measurements, functional, 307
- Nitrous oxide
  - effect of NO on CO response of SnO<sub>2</sub>-based thick film gas sensor in combustion gases, 271
- Offset-reduction method
  - sensitivity-variation, theory and practice of electronic implementation of, 197
- Optical image
  - tactile sensing array based on forming and detecting, 49
- Oxygen
  - effect of, on electrical conductivity of some metal oxides in inert and reducing atmospheres at high temperature, 281
- Photoimpedance response
  - CO detection by, of semiconductor film sensors, 161
- Polymeric film system
  - water vapour/, for humidity sensing, electrical and thermodynamic characterization of, 23
- Reaction cells
  - paper strips containing modular, 181
- Resistors
  - AlO<sub>x</sub> thin-film, study of effect of humidity on, 149
- Seebeck effect
  - tin dioxide gas sensors, use of Seebeck effect, 251
- Semiconductor
  - biosensors based on ammonia sensitive metal-oxide-semiconductor structures, 91
  - film sensors, CO detection by photoimpedance of, 161
  - gas sensors, problems and possibilities of oxidic and organic, 227
- Sensitivity control
  - of ISFETs by chemical surface modification, 129
- Sensitivity-variation
  - offset-reduction method, theory and practice of electronic implementation of, 197
- Sensor(s)
  - differential potentiometric, glass electrodes with solid-state membrane contacts and their application in, 261
  - electrochemical, and instrument for monitoring methane, room-temperature, 65

- functional multisensor for magnetic field and temperature measurements, 307
- gas
  - oxidic and organic semiconductor, problems and possibilities of, 227
  - SnO<sub>2</sub>-based thick film, effect of CH<sub>4</sub>, SO<sub>2</sub> and NO on CO response of, in combustion gases, 271
  - surface acoustic wave, based on film conductivity changes, 319
  - tin dioxide; use of Seebeck effect, 251
- integrated vacuum, 187
- micro-Hall, made of single crystals
  - InSb and GaAs, S/N study of, 29
- MOSFET-based, impact of, 109
- polycrystalline silicon strain, 219
- semiconductor film, CO detection by photoimpedance response of, 161
- smart; when and where? 39
- Sensor-actuator system
  - chemical, integration of; ISFET-based microlitre titrator, 11
- Silicon
  - humidity-sensitive Al-C-SiO<sub>x</sub>-pSi-Al structures, 245
  - polycrystalline silicon strain sensors, 219
- Smart sensors
  - when and where? 39
- Strain sensors
  - polycrystalline silicon, 219
- Sulphur dioxide
  - effect of SO<sub>2</sub> on CO response of SnO<sub>2</sub>-based thick film gas sensor in combustion gases, 271
- Tactile sensing array
  - based on forming and detecting an optical image, 49
- Temperature measurements
  - functional multisensor for magnetic field and, 307
- Temperature sensor
  - thick film standard paste, applications, 3
- Thermodynamic characterization
  - of water vapour/polymeric film system for humidity sensing, 23
- Tin dioxide
  - effect of CH<sub>4</sub>, SO<sub>2</sub> and NO on CO response of SnO<sub>2</sub>-based thick-film gas sensor in combustion gases, 271
  - gas sensors; use of Seebeck effect, 251
  - an SnO<sub>2</sub> thin film for sensing arsine, 101
- Titration
  - ISFET-based microlitre; integration of chemical sensor-actuator system, 11
- Vacuum sensor
  - integrated, 187
- Vibration analysis
  - of micromechanical elements, 235
- Water vapour
  - /polymeric film system for humidity sensing, electrical and thermodynamic characterization of, 23
